## ESMA Aviation Academy extends training offer in Africa with Hi-Fly Marketing

ESMA Aviation Academy reported the extension of its network to Africa through a representation agreement inked with Hi-Fly Marketing, a South African based aviation services company. With strong European roots and a broad international activity, ESMA can already capitalize on serious African references in its areas of competences:

- Train Flight dispatcher trainer for Air Mali, Air Ivoire and Air Burkina
- Ab Initio Pilot trainings for Algerian, Tunisian, Moroccan and Cameroon individuals
- Refresh Cabin Crew courses for Trans Air Congo
- Ab Initio Cabin Crew courses for Air Guinee International
- European Part 66 Aircraft Maintenance License for Aviation Handling Services in Senegal

ESMA and Hi-Fly Marketing will work together with governments, airlines, airports and other operators towards harmonizing the aviation training in Africa and will propose actions to be taken to standardize and assure quality, safety and compliance with the highest level of requirements of civil aviation and training technology. Priority focus will be in the areas of Maintenance and Flight Dispatcher Trainings.
